## (54) GAME DEVICE USING POSITION DETECTOR AND STORAGE MEDIUM

## (57)Abstract:

PROBLEM TO BE SOLVED: To provide a new game device that allows easily participating in a stamp rally by using a portable game machine, and a storage medium.

SOLUTION: The game device has a control section 2 carrying out game computation on the basis of position information on a player from GPS, and the control section 2 has a means to judge whether or not data on the altitude and latitude in more than one previously specified positions and the altitude and latitude of the specified positions and the altitude and latitude based on the current position of the player from GPS are coincident.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]
